TRES|SPA®

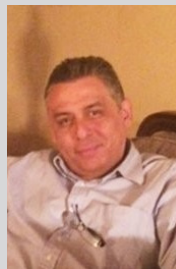

Bank of America is one of the largest banking and financial services corporations in the United States. The bank's history dates to 1904 when Amadeo Giannini opened the first Bank of Italy in San Francisco. In 1968 it became the Bank of America and after acquiring Seafirst Corporation and Security Pacific Corporation, Bank of America became the first to offer coast to coast operations in the United States. By the early 21st century it was operating 5500 locations in over 20 US States.

TECHNOLOGY

Trespa's advanced inhouse technology offers the performance necessary to represent and maintain iconic brand imaging over the life of the building.

Trespa® is a decorative high-pressure compact laminate (HPL) with an integral surface manufactured using Trespa's unique in-house technology, Electron Beam Curing (EBC). The blend of up to

70% natural fibers and thermosetting resins, manufactured under high pressures and temperatures yields a highly stable, dense panel with good strength-to-weight ratio. Trespa products also possess exceptional weather resistance. Testing shows no signs of deterioration during extreme weather conditions such as intense freeze thaw activity, salt water and air exposure, desert heat and direct Florida sunlight. Independent Bream Testing provides a life expectancy of over 50 years and with existing projects in place that are over 40 years old, Trespa has proven to be beyond comparison for offering best fade resistance, scratch resistance and providing a graffiti proof surface.

"The building looks good, they (ATS) were easy to work with, easy to explain to installers. Architects are happy. Good experience with it and it went exactly as the rendering, very beautiful."

Emad Bouless, Technical Director at Gensler

DELIVERY

ATS offers a state-of-the-art distribution model that supports an efficient, national, multi-unit roll out. Included in the program is installer training

"...ATS checked all the boxes regarding delivering a multi-unit program."

Michael Tully, Senior Associate at Gensler

and certification to meet Trespa's strict installation guidelines. GBA Architectural Products met all requirements for installation certification and were meticulous in executing a planned schedule even during the current COVID-19 challenges being experienced on all construction sites.

Scott Kershaw from Fiorilli Construction mentioned "The product is there by the asked date despite COVID-19 unlike other companies notorious for delays."

We have a great team of professional engineers, estimators and fabricators, a talented marketing team and an award-winning inside sales team to provide you with excellent support and service.

With our Quick Ship Panel website, contractors have direct access to our extensive inventory program 24-hours a day - making QSP a source for fast and easy ordering. As Trespa's international distribution partner for North America's retail, hospitality, and multi-unit program, we are uniquely suited to help retail and hospitality partners with the distribution of Trespa panels to ensure accurate deliverables to maintain a cohesive corporate Identity.

GBA Architectural Products' work on the Springdale Bank of America project

"Everyone worked cohesively and was very well organized. They were accommodating to the timeline, very knowledgeable, and kept in contact with the GC to know what they were doing."

Scott Kershaw, Superintendent-Projects at Fiorilli Construction, Inc.

is an excellent example of how important the Quick Ship Panel delivery process is. The project was faced with unforeseen delays, and standard QSP packaging protected the material until it was ready to install. Trespa recommends and provides a standard for storing material held on site.

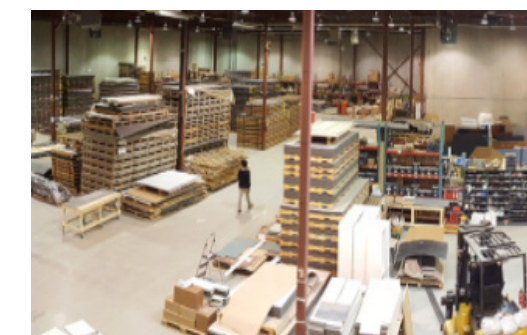

Typical packing: Labeled and protected + colour matched trims and fasteners.

"There were no delays, on time delivery, the right installers who knew what to do when the product showed up. Looks really good when installed, looks great for banks."

Jeff Jacobs, Senior Manager-Projects at Jones Lang Lasalle, IP, Inc.

Allied Technical Solutions Shop/Warehouse

Happy installer on site.
